

The Problem:

Weather and environmental impacts (UV radiation, oxygen, acid rain, road salt) cause tyres to fade and lose their gloss, i.e. their value and appearance.

The Solution:

P21S[®]

Tyre Shine

Carlsson
recommends P21-S

Product Advantages:

For sustained gloss and protection

- Provides immediate high gloss for faded tyres
- Offers permanent protection against weather and environmental impacts
- Also protects the tyres from bleaching through UV exposure
- Keeps your tyres smooth for an extended time
- Suited for used car treatment
- Efficient: one can suffices for around 20 tyres
- Spray can for easy and practical application

Applications:

Tyre walls

How to apply:

Spray P21-S Tyre Gloss evenly on the clean and dry tyre from a distance of 10-15cm. Wipe the wetted tread or rim with a soft cloth, if required. Regular application increases the effect.
