

The problem:

Blinding, oily films on car window interiors

Dirt and dust are blown through the ventilation system, and deposit on the inside of the windows. Nicotine and plasticizers from plastics worsen these blinding, oily films. This greatly hinders visibility, and thus endangers your safety on the road. Especially at times when the sun is low, or when there is light from cars coming the other way at night, every driver can tell just how much these oily films put you at risk.

The solution:

**Window Interior
Cleaner**
Wet & Dry Cloths

Product advantages:

Safety of crystal clear windows

- Removes grime such as dust, nicotine, plasticizers from plastics etc. from the window interior, leaving absolutely no streaks
- Practical, contains one wet & one dry cloth
- Optimal cleaning action from the two cloths
 - 1.Wet cloth takes off the rough grime
 - 2.Dry cloth takes off remaining grime and dries the window without leaving any streaks or lint
- Ideal for on the road, with its handy, minimalist packaging
- Optimum complement to CW 1:100 Highly Concentrated Window Cleaner

Applications:

Car window interiors

How to apply:

Clean the surface with the wet soft cloth and then rub down afterwards with the dry cloth. Always work in sections.
