

## The Problem:

It's a great tour and you're taking bend after bend, but it is getting dark and your sight gets dim – not because of nightfall but rather due to countless fly residuals sticking to your visor and helmet.

## The Solution:

## Visor and Helmet Cleaning Wipes

## Product Advantages:

Scratch- and streak-free cleaning on the go

- Scratch- and streak-free cleaning
- Suited for all visor types – whether transparent, tinted, metallised or with anti-fog coating
- Wet and dry cloth included
- Also suited for headlamps and touring windshields
- Small packing dimensions, ideally suited for cleaning on the road
- Special price offer for packs of ten

## Applications:

For visors, outer helmet shells, headlamps and touring windshields

## How to apply:

Place the soaked fleece cloth on the surface to be cleaned and let react for 30-60 seconds. Remove the dirt with the soaked fleece cloth subsequently and rewipe lint-freely with the dry cloth.

**Note:** Not suited for pin-lock visors.
