

The problem:

Scratches in the convertible rear window

Plastic rear windows easily get blind spots and scratches due to weather, dirt and aging. This leads to an indistinct view and to blindings especially at night.

The solution:

**Convertible Rear
Window Polisch**

Product advantages:

Removes scratches and blind spots on plastic rear windows of convertibles

By using the A1 Convertible Rear Window Cleaner, specially created for convertibles, such blind spots and scratches get removed, which makes a clear view, without being blinded. This also leads to a far more attractive high-quality appearance of the convertible. The A1 Convertible Rear Window Cleaner can be applied very easily and is also suitable for polishing machines.

Applications:

On Plastic rear windows of cabriolets

How to apply:

Shake well before use. Plastic rear windows may be cleaned before by using the CW 1:100 Inner & Outer Windscreen Cleaner, if very dirty. Apply the A1 Convertible Rear Window Cleaner economically by using polishing cotton or any other soft cloth onto the rear window under slight pressure. Polish with a towel. Not to be used under full sunlight or on hot surfaces. To be kept safe from frost.
