

The problem:

**Paints must be lastingly protected against damaging environmental influences.
Also, with exposure to the sun over time, paint starts to fade and become unsightly.**

Paints must be lastingly protected against damaging environmental influences. Also, with exposure to the sun over time, paint starts to fade and become unsightly. Car paints are greatly stressed by environmental influences such as UV rays, rain, insects, bird droppings etc., and must therefore be protected against these influences. Sun rays bleach the colour of the paint, making it unsightly over time.

The solution:

**Speed Wax
PLUS 3**

Product advantages:

- Lasting preservation
- Mirror-like high gloss
- Intensive colour restoration

A1 Speed Wax PLUS 3 is the advancement on A1 Speed Wax, and is therefore the ideal product for demanding users:

- Lasting preservation to protect against weathering and environmental influences
- Mirror-like high gloss after polishing with A1 Speed Polish
- Intensive colour restoration of bleached paints, after one polish
- Unbelievably quick and easy to work with, without leaving streaks or clouding
- With special sponge for ideal results
- Solvent-free

Applications:

Suitable for all paints (metallic and normal paints)

How to apply:

Wash the vehicle with A1 Speed Shampoo and then chamois down thoroughly. Depending on the condition of the paint, polish with A1 Speed Polish before use. Do not use under a hot sun or apply to hot paint. Shake the bottle before use. Apply A1 Speed Wax PLUS 3 thinly to the dry paint using the supplied special sponge, and polish off with a terrycloth towel or cotton cloth (not with wadding). Then polish the surface until you get a high gloss. Turn the cloth over frequently. It is recommended to repeat this application twice yearly.
