

The Problem:

Lacquers must be protected effectively against harmful environmental impacts. In addition, lacquers bleach from sun exposure over time and become unsightly. Car lacquers are highly stressed by environmental impacts, like UV radiation, rain, insects, bird excrements, etc. and must therefore be protected from these impacts.

The Solution:

Speed Wax Plus 3

NEW! CARNAUBA BOOSTER

- + Stronger mirror finish
- + More brilliant colour depth
- + Longer protection

Product Advantages:

Stronger high gloss, more brilliant colour depth, longer protection

Using the new CARNAUBA BOOSTER TECHNOLOGY takes the features of the world's hardest and most expensive wax to a new level.

- Creates an even stronger mirror finish
- Enables an even more brilliant colour depth
- Protects even longer against weather and environmental impacts
- Extremely fast and easy application without streaking and clouding
- Suited for all lacquers (metallic and standard lacquers as well as nano- and/or more scratch-resistant lacquers)

Applications:

Suited for all lacquers (metallic and standard lacquers)

How to apply:

Wash the car with A1 Speed Shampoo and subsequently rub thoroughly with a leather cloth. Depending on the lacquer condition, polish with A1 Speed Polish or A1 Ultima Show & Shine Polish before applying the product. Do not use in extreme direct sunlight or on hot lacquer. Shake the bottle before use. Apply the A1 Speed Wax PLUS 3 sparsely to the dry lacquer, using the included special sponge. Let dry thoroughly and polish away with a washed and dry terry or cotton cloth (do not use wad). Turn over the cloth frequently. We recommend you to repeat the application 2 or 3 times per year.

Note: Store the bottle in a frost-protected place.
