

The problem:

Dirty and bad smelling upholstery seat

A regular use of the vehicle can cause contaminations or stains on upholsteries and carpets. Previous Upholstery-Foam-Cleaner didn't clean upholstery or carpet properly. Unpleasant odors are only covered and come out again after a while.

The solution:

**Upholstery
Foam-Cleaner**

Product advantages:

- With smell killer
- Superior cleaning power as well for tough stains

- Cleans upholstery (drapery and velour), carpet and roof top
- Superior cleaning power for heavy soiling and tough stains such as coffee, ketchup and shoe cream
- With integrated odor-killer. It does not merely cover the odors but eliminates them reliably. It even works for spilt milk!
- Easy and effective application because of a good dosage
- Safe-to-use on every surface and material
- Refreshes colours due to its cleaning action

Applications:

For all types of upholstery, velour upholstery, carpets and vinyl covering

How to apply:

Hoover rough dirt first. Shake well before use and spray on surface (tough stain - let the cleaner work for 5 minutes). Clean with a wet cloth or sponge thoroughly. Wash the cloth/sponge in between. Then wipe over with a soft, clean cloth. If necessary repeat the procedure. Residual cleaner (residual frothing) can simply be brushed or hoovered after drying.
